

LEARNING/INSTRUCTIONProgram Descriptions

Each school shall develop and distribute individual school handbooks which describe local school guidelines and procedures.

The school handbooks are a supplement to the "K-12 Guide to Programs" which describes citywide alternative programs and general course information.

Each handbook at the elementary level will contain the school's practices, guidelines, and procedures.

The handbooks at the secondary level should contain building guidelines and procedures as well as course offerings, course goals and objectives, activities, prerequisites, grading criteria, graduation requirements, extracurricular activities and assessment methods.
